BLEACHING POWDER BLUE - effect antigiallo with D- panthenol

Discolour the utmost respect for the skin and hair, and evenly lightens with impeccable results. BLEACHING POWDER COLOR LINE JOC is designed to discoloration totals, averages, or read, highlights, pickling and balayages. The formula D- panthenol acts by protecting and hydrating the hair, while the blue pigments that make up the neutralize the effect of making the yellow color more natural. Thanks to the granules of which it is composed, BLEACHING POWDER does not disperse in the air during mixing, ensuring a working environment safer and healthier.

The D- panthenol, an important ally, is a provitamin whose properties are known and appreciated for years in the professional hair. Used in formulations more effective, repairs damage caused by aggressive chemical or mechanical treatments, maintaining the right level of hydration and preventing dryness of the hair and the formulation of split ends. In the formula of BLEACHING POWDER D- panthenol acts in synergy with special cationic ingredients that make the hair soft, elastic and easy to comb.

method of use : in a non-metallic bowl pour two tablespoons of powder and add oxidizing emulsion in the amount necessary to obtain the desired consistency (2 parts of oxidant and 1 part powder).

Use Joc Oxide on 20/30/40 Vol depending on the degree of bleaching desired. It is advisable, therefore, to control the degree of bleaching during installation (minimum 20, maximum 35 minutes). Rinse thoroughly with warm water, then go to Joc Re -Balance Shampoo.

box: 250 g bag in pack of 2
