TEXTURE MAKER

texturizing spray

The product has been tested by comparison with untreated hair and the results have shown a better seal, better anti-frizz effect, a better definition of the fold and the texture and greater ease in creating the hairstyle and the styling. The technology Air Tech uses a combination of three polymers, dispersed in the form of tiny droplets that create a thin layer, homogeneous and uniform around the hair, gives great

brilliance. The result is a smooth and homogeneous surface of the hair that makes possible an amazing light reflection. The formula Water Tech is composed of polymers useful for styling and minerals of oceanic origin that are deposited on the surface of the hair in the form of micro - crystals which determine that effect mordant and the clutch, which are indispensable to obtain a unique texture.

box: 150 ml bottle.
