BABYLISS DRY & STRAIGHTEN

Model: BAB2073E

nanoceramic Plate Titanium & Sol Gel Technology.

A unique ventilation system allows you to use the straightener on wet hair. Openings on the top and bottom of the plate facilitate the evacuation of the steam generated during the smoothing retaining the natural moisture of the hair and favoring the penetration into the cuticle of the hair products and styling.

Temperature adjustment on 5 levels (from 115 ° C to 230 ° C).

Switch and indicator light operation. Cable girevoledi 2.70 m.

Advanced Heat Management System: ultra-fast achievement of the temperature and stability guaranteed with deviation of half a degree along the entire length of the lock.
