Argan oil for dry and sensitized hair

Argan (Argan or Argania sideroxylon) is a common tree in the arid landscapes that characterize the southwest of Morocco. The fruit is a berry that produces green color, similar to an olive. Inside it contains a particularly hard core, which in turn contains two or more almonds from which we extract the famous Argan oil. Argan oil is rich in unsaturated fatty acids and Vitamin E (protects cell membranes from the damaging action of free radicals and plays an anti-aging effect) that make it a perfect ally to hydrate, nourish and protect it from external aggressions. Argan oil also contains other important active substances such as Vitamin A, Vitamin F, linolenic acid, Omega 3 and Omega 6. Argan oil is a genuine beauty elixir for dry, brittle hair, brittle and lack luster.

ARGAN MOISTURIZING SHAMPOO
