### SILK'N PRO SILK'N PRO

#### Silk'n Pro

the first photo-epilation recommended by doctors for hair removal in the privacy of your home. Safe, easy to use and affordable, Silk ' pro drug has shown clinical results, even the best professional equipment worth several thousand Euros. The Silk'n Pro uses a new technology called Advanced Home Pulsed Light (HPL), created by its Home Skinovations Ltd for a household in complete safety. HPL uses the theory of selective photothermolysis, where the optical energy (IPL) is used to block the growth of the hair.
